To whom it may concern,

It is my pleasure to recommend Annika Aschoff for your MES program. I came to know Annika as a student in the disaster risk reduction minor at Western Washington University. She successfully completed two of my courses; U.S disaster policy and Disaster Reduction and Emergency Planning Studio. She was a determined and engaging student who was interested in the course material and willing and eager to expand her academic and professional knowledge on environmental hazards and emergency management. She chose to participate in the Community Emergency Response Training program as part of her coursework, in which students were given hands on experience in the professional field of emergency management.

Overall, Annika is tenacious and intelligent which was evident in her course work. Annika seemed eager to learn and willing to help when necessary, she consistently met expectations, and she is a dependable and a hard-working student and a reliable team member.

Annika's work in my courses leads me to believe that her education and knowledge would be greatly enhanced by a graduate program of study. Her professional goals would be highly elevated by further experience in the environmental studies and marine policy fields. If her performance in my class is an indication of how she would perform as a graduate student, she would be able to succeed in your program.

Sincerely,

Jonah Stinson, MS

Instructor, Western Washington University
