OBJECTIVE

Biology student with a strong interest in ocean ecology and migratory behaviors of marine species. Looking to pursue graduate level educational experience to gain a position in marine research.

EDUCATION

BA/BS | The Evergreen State College

2020 – 2022

Coursework included Gen Chem/Gen Bio, Microbiology, Organic Chemistry, Marine Environments, Aquatic Toxicology, and GIS

EXPERIENCE

Lead Field Technician | Hinchinbrook Eco Innovation

MAY 2022 – PRESENT

Field science technician and diver working for the Wenatchee Forest Science Laboratory. Primary responsibilities include Juvenile Salmon capture and tagging, species identification and measurements, and data collection for research work assessing impacts of restoration efforts as well as providing further analytics for salmon life-cycle modeling.

Lab Aid | The Evergreen State College

AUG 2021 – JUN 2022

Assisted the lab supervisor with the preparation of lab equipment, cultures, and chemicals needed for effective lab sessions in Gen Chem/Bio, Organic Chem and Microbiology, and Marine Environments. Also assisted with field lab prep work including boat handling and student transport.

Adventure Guide/Instructor | Kaf Adventures

JUN 2015 – JUN 2020

Provided guided experiences in mountaineering, rock climbing, ice climbing, and backcountry navigation. Delivered educational curriculum on glacier travel, crevasse rescue, anchor and traditional climbing technique, lead climbing, and map/compass. Ensured the safety and care of individuals in extreme environments while promoting environmental protection and leave no trace practices.

SKILLS

- Excellent written and verbal communication
- Ample field experience in varying conditions
- Current relevant research work
- Extensive science coursework

- Considerable lab time and field research
- Microsoft office and GIS experience
- Engaged member in a team environment

ACTIVITIES

I am passionate about the outdoors and the importance of sharing in its wonders, educating on the importance of protecting our wild places, and the value of understanding how a vibrant diverse ecosystem is critical to all life that share this planet. As a mountain guide I spent many years providing experiences and educating others on the diverse environment that is the Pacific Northwest. My certifications include Rock and Alpine Guide, Ice Climbing Guide, Avalanche Rescue, Crevasse Rescue, Wilderness First Responder, and Leave-No-Trace.

I am in my second season of research work with juvenile salmon. This work is part of a on-going restoration project in the middle Intiat River of Central Washington. Continued research has been vital in showing the positive impacts of habitat restoration. Much of this work is done through dive and snorkel work. I am currently a certified Rescue Diver.
