To Reviewers,

I am writing to recommend Mackenzie Kleiva for Evergreen's Masters in Environmental Science Program. I've had the pleasure of working closely with Mack as their business partner for our nonprofit organization, Metamimicry. I can confidently say that they are an exceptional individual, possessing the ambition, intelligence, and direction necessary to be a successful candidate for the MES program.

Over the past two and a half years, I have gotten to know Mack's work ethic intimately as we are the founders and main effort behind Metamimicry. Mack has an unwavering drive and passion for addressing regional environmental issues that is truly commendable. From the moment we began our nonprofit, it became abundantly clear that they possess a contagious dedication to effecting positive change in our community. Their ambition inspires those around them, helping to create a mosaic of driven people, working on what they believe in.

One of Mack's most outstanding qualities is their intelligence. They possess a systems-thinking mind and innate ability to grasp complex environmental issues, recognizing Western and Indigenous sciences while holding an analytical disposition. Mack consistently demonstrates their proficiency in conducting comprehensive research, analyzing data, and deriving innovative solutions. Their exceptional problem-solving skills have also been instrumental in overcoming numerous obstacles we encountered navigating the nonprofit world.

Mack is a natural leader, with an air of confidence and drive. The successful growth and impact of our organization can be attributed to Mack's tireless work ethic, combined with their ability to envision and execute effective strategies. They hold a strong business acumen which has allowed us to secure significant funding, establish strategic partnerships, and create focused programming which is vital for aptly addressing environmental issues through a nonprofit.

In conclusion, I wholeheartedly recommend Mackenzie Kleiva for your program. Please feel free to reach out to me if you have any questions or want to learn more about Mack's capabilities from their business partner's perspective. I am very excited to see what the future holds for Mack after going through Evergreen's MES program.

Signed,

Jade Frolic, Executive Director at Metamimicry
