To whom it may concern,

This letter is on behalf of Joe O'Sullivan for consideration of his entry into graduate studies.

Joe worked with our Strategy and Technology group at Weyerhaeuser during the summer of 2022 as an nursery research intern under direct supervision of myself and Rebecca Sheridan (PhD) in our roles as plant physiologists and nursery scientists.

During this time, Joe was involved and contributed significantly to research initiatives on new nursery stocktype development. This entailed participation in a broad array of lab and field activities such as growth tracking in nurseries, lab measurements of plant moisture stress and seedling hardening, stock stem quality assessments and ingress of nursery pathogens, support on seedling imaging and nursery inventory processes using machine learning.

In all cases, Joe demonstrated flexibility, focus, curiosity, engagement and made many practical contributions to our summer research program. He proved a quick study on any assignment and became one of the most useful research interns we have had over multiple years. He is by nature focused, committed, and well suited to research in addition to being a personable, reliable, and a creative team member. I am thrilled that he is considering furthering his interests through graduate studies and unreservedly support his application and his consideration for your program.

Sincerely,

Edgar Fuchs

Weyerhaeuser Strategy and Technology.

Sr. Nursery Research Scientist
