

This is a professional reference for a terminal masters degree program

To whom it may concern,

I wholeheartedly recommend Thomas Mason to your Program.

During my service with then Sgt. Mason, I was always impressed with his leadership and how he helped mold younger Marines to become better leaders.

It's not easy to get a bunch of hard-charging marines to conform to anything, but with his steady guidance and instruction, his teams always performed better than most. He and his team played a vital part in our missions. Communications, which is an integral part of any Military mission.

Since our time on active duty, Thomas has been key to helping several of our Marines and other Units of Marines obtain the Veterans benefits that they have earned and the support that many of them need daily.

He has my support and full recommendation and I wish him the best in your program, although I know he will succeed.

Many regards,

Jim Rescorla
