To whom it may concern,

I am writing in support of Emma Stock for her admission to your Masters of Environmental Science degree program. I have known Emma throughout her career as an undergraduate student at Bellevue University. Emma was a student in my general, organic, and biochemistry courses as well as in a botany course I teach. I am very familiar with Emma as both a student and as a person and believe that she would be an excellent addition to your program.

In all the courses Emma took with me she was an intelligent, engaged student. I was able to observe her in both the lecture and laboratory setting. In lecture she was attentive and inquisitive. She actively participated in class and academically was one of the best students in her sections. She showed good academic prowess and commitment to her education, even with the added obligations of being a student athlete on the women's soccer team. In lab Emma was a safe and engaged lab partner. She worked well with the others in her lab group and also showed some leadership abilities among her peer students. Emma has also shown a keen interest in student research. While I am not Emma's faculty mentor for her lab research, I have been able to observe her in the research lab where she has shown a commitment to the research for her senior thesis project. I believe that this lab research is helping her to prepare for what is expected at the graduate level. Overall, I believe that Emma will succeed in graduate school and is worthy of joining would be a credit to any graduate program in Environmental Science. I recommend her highly and without any reservations.

If you have any further questions about Emma, please feel free to contact me at (402) 557-7521 or spinkerton@bellevue.edu.

Dr. T. Scott Pinkerton

Associate Professor -Chemistry, Program Director – Biology
