Dear Graduate Admissions,

December 12, 2023

It is with great pleasure that I recommend Alexander Sullivan (henceforth to be referred to as "AJ") for the opportunity to attend Evergreen College in the Graduate Program for Environmental Studies. Throughout our time working together at Hematologics in Seattle WA, AJ consistently demonstrated exceptional critical reasoning skills, adept at analyzing complex situations and providing insightful solutions.

Working for a small company, in a fast paced and highly complex clinical lab setting, requires a level of ability to navigate and analyze complex clinical scenarios, ensuring accurate and efficient decision making, to assure that patient outcome or turnaround time is not affected. AJ not only was able to work efficiently in this environment, but demonstrated this skill, which is paramount in clinical lab settings, where precise and thoughtful reasoning is essential for accurate diagnoses and data interpretation.

When it comes to data interpretation and quantitate analysis, he has a proven track record of navigating through diverse datasets related to patient samples. This includes a proficiency in statistical methods and a sharp eye for identifying patterns, both crucial aspects in a clinical lab environment.

In terms of communication, both written and verbal, AJ stands out. He articulates ideas with clarity and precision, whether in reports, presentations, or discussions. This ability greatly contributes to effective collaboration within our small team of technical staff, the medical professionals onsite, as well as the Pathologists and Oncologists who were looking to our lab to provide diagnostic insights.

In conclusion, AJ is an outstanding individual with a unique blend of critical thinking, data analysis, and communication skills, which was an ideal skill set for a complex clinical lab environment. He would undoubtedly be a tremendous asset in any role that requires a keen analytical mind and effective communication.

Sincerely,

Kelle Hammock
