EDUCATION

2021-2023

Associates of Arts and
Science: Bellevue College

2023-2025

Bachelor of Science: The
Evergreen State College
Expected June 2025

PROFILE

Throughout my time at Juanita High School, I was part of the advanced Cambridge program and took my A and AS levels for college credit, as well as earning my AICE diploma. I then got my Associates at Bellevue Community College, then transferred to The Evergreen State College for my bachelor's degree. I was a Girl Scout all the way from kindergarten to high school and earned a Bronze and Silver Award, with a plan for a Gold Award that was interrupted by the COVID lockdowns. I volunteered for a Girl Scout camp as detailed below and was active with my UU youth group. My college classes were chosen to provide me with a background in the field of Environmental Science, and I have two years' worth of experience in college-grade labs from Integrated Natural Science (biology and general chemistry), and Science of Carbon (biochemistry and organic chemistry).

EXPERIENCE

Girl Scouts Silver Award

2018

Worked to address the issue of low-income families losing access to the free lunch provided by schools during the summer by creating and distributing bucket garden kits that would allow them to grow their own food inside apartments. Researched low-maintenance plants that would provide repeating food yields. Worked with a partner to plan, fundraise, get supplies, and distribute the completed bucket gardens. Partnered with a local organization to organize and carry out distribution.

Rainbow Adventures Camp Program Aide

2017-2019

Worked as a PA (Program Aide) for a day camp. Set up and led activity sessions, watched over campers in age groups ranging from kindergartners to 7th graders.

Steering Committee Member Rainbow Adventures Camp

2019

Worked within a budget to plan activities for a variety of age groups to do in a week-long camp. Organized logistics and sourced supplies. Helped determine roles for which volunteers would do what.
