To:

Evergreen State College

To whom it may concern:

I am writing this letter of recommendation on behalf of Cynthia Garcia, an Aquaculture Technician at Riverence Brood LLC, in Rochester, WA.

Cynthia has been an integral part of our technical operations at Riverence Brood since arriving. Our yearly work with each generation of salmon requires coordination and sampling with veterinarians, disease testing laboratories, and other government entities. Cynthia has assisted our department in dozens of sampling operations in which she was entrusted to complete sampling that determines our ability to export eggs. It was clear very early on she is technically proficient, detail oriented, and learns skills quickly. She takes interest in learning and picks up on nuanced material well. I have personally observed Cynthia work through process issues with logical steps and focus instead of panic or frustration. To summarize, she strives to grow in knowledge and skill.

Cynthia has also been an asset on a basic level outside of work's main duties. She shows up on time every day and is extremely reliable. She is steady in demeanor and maintains a friendly relationship with everyone on staff. Furthermore, she can work with anyone and has a good sense of humor. Cynthia has also been an excellent host to customers that visit from all over the world. The traits above are why she has been entrusted with assisting and leading at Riverence Brood, and why we consider her to be candidate to continue to grow into a larger role.

I believe Cynthia makes an excellent candidate for the Master's in Environmental Studies program and recommend her as a student who will excel at The Evergreen State College.
