Skills Summary

- Organization
- Conservation projects
- Water Quality Surveying
- Invasive species removal
- Laboratory Etiquette
- Collaboration
- Adaptable
- Problem-Solving
- Punctual

Education

In Progress: Bachelor's Degree: Biology/May of 2025

Saint Martin's University

5000 Abbey Way Southeast, Lacey, WA 98503

- 3.56 Cumulative GPA

Saint Martin's University

Student Library Assistant / September 2021 – Present

Check-in and out books as well as other materials to library patrons, shelve used books and materials, assist library patrons in finding materials, and provide help with research when needed. Routinely disinfect equipment maintenance.

Stream Team Intern

Hood Canal Salmon Enhancement Group / May 2024 – August 2024

Creating and sustaining monitoring protocols on current and newly restored river and estuary systems and performing habitat surveys on selected hood canal watersheds. Interns surveyed existing Hood Canal River and estuary systems and collected data on important habitat indicators within the systems, such as fish, vegetation, birds, wildlife, water quality, and wood material.

AmeriCorps

Washington Conservation Corps Member / June 12, 2023 – September 10, 2023

Restoration crews support habitat restoration and enhancement projects such as planting trees and shrubs, removing invasive species, and monitoring and maintaining restoration sites.

Community Service

- Powell Creek Restoration Project with the Nisqually River Education Project
- Union River Chum Run with the HCSEG
