

Hello,

I would like to petition for admittance to the MES program despite not currently possessing some of the pre-requisites.

I am confident that I meet both the Social Sciences and Statistics requirements for the MES program already—if there is any doubt, I am happy to provide further credentials of my completed pre-requisites. For Natural Sciences, I have already completed a quarter of Astronomy in the last five years and am in the process of taking a Geology course at Shoreline Community College, and am happy to take other classes if needed for this pre-requisite. I have also taken a course in Forest Management from WSU, though in a less academic and more professional context (i.e. it isn't on any transcript).

Please feel free to contact me with any questions or concerns.

Thank you,

Tully McCombs
