To whom it may concern,

I am writing to strongly recommend that Tully be accepted onto the Master of Environmental Studies program in my capacity as their dissertation supervisor in 2022 when they were completing the Cognitive Science MSc program at the University of Edinburgh. Given the interdisciplinary nature of the work conducted at The Evergreen State College, this would be a natural continuation of the highly interdisciplinary Cognitive Science program at the University of Edinburgh, in which Tully achieved high grades.

Tully has demonstrated strong abilities in their graduate level academic writing, as demonstrated by their dissertation work and their successes across a range of postgraduate modules offered at the University of Edinburgh. The same also goes for Tully's verbal and written communication skills more broadly as Tully was able to contribute fully in our supervision sessions and they were able to convey their ideas clearly in writing. Tully's quantitative analysis, research design and critical reasoning skills are also strong, as they showed expertise with a range of statistical quantitative techniques in their dissertation methodology, including displaying the results of these methodologies in a clear manner. In addition to these academic qualities, Tully has proven themselves to be a hard-working and highly motivated student who would undoubtedly be an asset to the Master of Environmental Studies program.

In summary, I give Tully my highest recommendation for admission to your program. They have consistently demonstrated the qualities necessary for success in graduate study and beyond. Please do not hesitate to contact me if you require any additional information.

Yours Faithfully,

Alexandra Krendel
Lecturer in Applied Linguistics
Department of Languages, Cultures and Linguistics
Building 65
Avenue Campus, University of Southampton, SO17 1BF United Kingdom
