

I am petitioning to waive the social science within the last 5 years' requirement due to the fact that most of my BA of history consisted of social science classes and have a large number of them that I have taken as the core of my degree. While it has been over 5 years, my knowledge and interest in history has not waned.

For the natural science and statistics prerequisites, I will take Revitalizing Traditional Medicine in the Americas and Statistics I at Evergreen for the winter 2025 term to meet those prerequisites. If I encounter any difficulties I will have the spring 2025 term to ensure I meet the prerequisites.
