

28TH ANNUAL RACHEL CARSON FORUM, 2017
hosted by the Master of Environmental Studies Association

WATER EQUITY IN THE ANTHROPOCENE

the evergreen state college

Thursday April 20th

TESC Library Lobby

3-5 Dr. Lauren Ross and Michael Tuncap speak on indigenous and historical struggles for water equity in the United States.

Dr. Lauren Ross is an environmental engineer and owner of Glenrose Engineering, Inc. in Austin, Texas. She has passionately worked on water and environmental justice issues as an ecological engineer, teacher, and activist.

Michael Tuncap is the founder of the Pacific Islander Studies Institute in the state of Washington, and serves as the Director of Diversity, Equity, and Inclusion at Green River College.

Thursday April 27th

Red Square

3-6 Community Tabling Fair, with free food, art, and live music. Please bring a t-shirt to tie-dye!

6-9:30 Short lectures & round table discussion

Ernesto Peñas Lado, European Fisheries Commissioner, will speak on the need for international governance in conserving marine resources.

Anna Bachmann, founder of Water Keepers Iraq and an MES grad, will speak about hydropolitics and water rights in the middle east.

Andy Haub, primary author of the City of Olympia's handbook on climate change, will talk about how Olympia is preparing for sea-level rise.
