HOWARD RAINIER

Howard T. Rainer, program administrator for the Native American Educational Outreach Programs at Brigham Young University, has had the great fortune to work with Native Americans of all ages for over two decades in promoting educational opportunities, personal enhancement, and spiritual growth among his people. His strong beliefs of perpetuating individual success, nurturing spiritual values, encouraging tribal advancement and promoting positive change among Indian people have been a consistent message in Native communities throughout North America for many years.

Howard is an advocate for Native American Pride and Progress!

His messages have become a source of hope and inspiration to those Native American youth and adults who want to hear and read about positive self-discovery, personal advancement, and the rewards of valuing Native and non-Native education.
